F O R E W O R D

THE effectiveness of Pergolas, Garden Houses and other architectural features in giving character and completeness to the gardens and areas of considerable extent has been recognized for many years, but the possibilities of their use in beautifying more limited spaces, down to the dimensions of a small city lot, and in connection with every style and character of dwelling place, has been demonstrated only within recent years. It is the mission of this issue of THE PERGOLA ALBUM to show, by photographic illustration, the possibilities in effects of architectural adornment in extensive private gardens and public grounds,

where their adaptations are practically unlimited, and at the same time offer suggestions for the beautifying of modest homes confined to the most limited garden areas.

In looking through these pages, keep in mind that the illustrations and descriptions are merely suggestive of the comparatively few adaptations of the Pergola, and other architectural features. The designs shown are not stock patterns, therefore the size and general proportions of any of the designs shown can be changed if necessary to suit the requirements of any particular space. We have a designing department to advise with prospective clients, and to co-operate in the developments of any special problem.

A Garden Scene at Wilmette, Illinois. Philip B. Maher, Architect

Specifications on Which Our Pergolas, Garden Houses, Etc., Are Furnished

ALL round columns are the well known "Koll-Patent" Lock-Joint Wood Columns, built with due regard to the architectural proportions of the designs they represent, they are provided with Cast Iron Plinths and iron rods to anchor the columns to the foundation. Tops of columns are flashed with galvanized iron.

The material for the overhead work is of sizes made in correct proportion to the size of the structure. All work is carefully fitted at our factory with the idea in mind of simplifying the installation, and to reduce the cost of erection on the job. All materials, unless specified to the contrary, are primed with a coat of white lead and oil.

Foundation Plans, with the lower section of the iron rods, will be sent immediately upon receipt of order, so the concrete work can be put in during the time that our material is in transit. Complete drawings and working details are furnished by us with the material to assist in the erection of the work. All lattice work is put together, Flush-Joint Construction, and primed with a coat of white lead and oil.

FOUNDATIONS: The most satisfactory form of foundations for pergolas is concrete piers, but should it not be found convenient to put in concrete piers, a quite satisfactory form of foundation can be had by using cedar posts placed into the ground below the frost line and extending two feet into the columns. (See cut below.) The cost of cedar posts required is included in our price, and will be furnished in place of the iron rods, which are not needed with this form of foundation.

PRICES: All prices quoted, unless specified to the contrary, are intended to cover all material necessary to build the work above the foundation. The foundation, cost of erection, and giving the work the final coats of paint, *Are Not Included.*

TERMS: All prices quoted are F. O. B. factory. Cash or satisfactory reference to accompany all orders from parties unknown to us. Prices subject to change without notice.

Pergola of "Standard Design"
Size, 8 ft. x 48 ft. Price\$360.00

Colonial Gate Posts and Fences

These illustrations are from photographs of old New England homes and are introduced to show how the consistent use of ornamental Gate Posts and Fences heightens the effect of home exclusiveness and puts the finishing touch on the expression of the Colonial spirit in home building and adornment.

The idea of transforming the roofs of Apartment Buildings and Hotels into Garden Spots is becoming more popular every year. These illustrations show two roofs on the top of New York City Apartment Buildings. Our designing department is in position to offer suggestions to those who might be considering work of this character.

While our Pergolas, Garden and Shelter Houses can be supplied with Columns represented by the five orders of Architecture, or to special detail if desired, we offer the above designs as the ones most generally used for work of this character. All Columns furnished for this purpose are equipped with Cast Iron Plinths, shown on the illustration below.

Ventilated Cast Iron Plinths

If interested in a more detailed description of our "Koll Patent Lock-Joint Wood Columns," with which all our Pergolas and Shelter Houses are equipped, write for Catalogue No. P. C. 47.

Garden Furniture

On the following pages we offer a few suggestions for the beautifying of home grounds by the use of smaller Architectural Features such as Rose Arches, Garden Furniture, and Lattices. It includes items that can be used in limited areas or more pretentious grounds.

No matter how simple or elaborate the design may be, it is built to endure and fulfill its mission of making the Garden or Home Surroundings a more beautiful and inviting place to live with.

ALL ARTICLES illustrated on pages 42 to 47 are Painted, Three Coats, IVORY or WHITE, unless otherwise specified.

ALL ARTICLES represented on pages 48 to 53 will be furnished Primed One Coat, or with Three-Coat Finish, in IVORY or WHITE, if so ordered.

Goods for shipment are carefully packed to insure safe delivery at destination.

All Prices are F. O. B. Chicago.

Prices subject to change without notice.

Art Stone Furniture and Garden Accessories

THE following pages offer suggestions for the beautification of Lawn and Garden with Art Stone Furniture, Sundials and Gazing Globes.

Vases and Flower Boxes are provided with drain holes in the bottom, but they can be placed in the sides when so specified.

In ordering any article listed in this catalogue, state first the quantity desired, then the catalogue number of the design selected.

The Art Stone, articles listed in the following pages, 54 to 61, are made light gray in color, or so-called GREY CEMENT SHADE.

Any article in this class of Art Stone goods can be furnished in Granite, or Caen Stone color at 10% in addition to the prices quoted.

Prices subject to change without notice.

Gazing Globes

Among the many interesting objects in a Garden the Gazing Globe properly placed proves a leading attraction. It is invariably the center of a mysterious delight to household and guests; where the unaided eye grants you only details, this panoramic sphere gives you a bird's-eye view of everything, just as you would see it from the top of a mountain. The charm of it remains, nobody forgets the spell of its beauty.

Gazing Globe, 10 in. diameter.....	\$11.50
Gazing Globe, 12 in. diameter.....	13.00
Gazing Globe, 14 in. diameter.....	15.00
Gazing Globe, 16 in. diameter.....	18.00

Gazing Globes are shipped from
CHICAGO, or NEW YORK stock

No. 771— Pedestal for Gazing Balls

Height, 45 in.,
Base Width, 13½ in., Wt. Crated,
300 lbs.
Price.....\$22.50
(Above price is for
the Pedestal only.)

To avoid the deterioration of the silver lining on the inside of globe, the stem opening on Gazing Globes must be sealed securely to avoid moisture or air from getting access to the inside of the globes. Pedestal for Gazing Globes must be sufficiently hollow through the center of Pedestal to drain any accumulation of moisture or water.

To Set Gazing Globes

Apply sufficient quantity of Window Putty around the stem hole of Pedestal, which will insure a close and compact fit for the Gazing Globe stem. A heavy coat of grease or thin oiled paper should be applied around the stem to prevent the putty from sealing to the glass.

No. 761— Pedestal

Width 11½ in.,

Cast Bronze Sundial, No. 35

11 inches diameter, with raised figures and motto. Weight of Dial complete, 6 lbs. Price.....\$9.00

Sundials

THERE is nothing more attractive or useful than the Old Style Sundial. Without its Sundial a country home is not complete. It possesses an individuality that is hard to explain, while a clock (no matter how fine) never enters into our affections like the old Sundial standing in the garden; it becomes part of the place as much as the house itself.

In ordering always state where Sundial is to be used, giving County and State, so that dial will be correct for the latitude. In setting the dial it must be placed so that the center of the noon mark is pointing to the true North (not magnetic), with the stile or gnomon perpendicular, inclining neither to the right nor left. As the declination or deviation of the compass from the true North varies in different localities and at different times, we furnish correct reading for your latitude when desired.

In setting the Sundial it must be placed so that the center of the noon mark is pointing to the True North (not magnetic), with the Gnomon or Time Indicator perpendicular, inclining neither right or left. As the declination or deviation of the compass from the true North varies in different localities and at different times we will furnish you with correct reading for your latitude, at time of purchase.

Table of Time Equation

Owing to the difference between solar and clock time, the Sundial is right with the clock only four days in the year, ranging from fourteen minutes slow to sixteen minutes fast. To correct these differences, a Table of Time Equation is a necessary accompaniment for the Dial.

The actual size of brass plates is 3 1/2 x 4 1/2 inches, with very plain and distinct figures.

Price, each.....\$1 00

The Mottoes on Dials on this page cannot be changed.
